No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                             US-10-735-014-83

CDNA library was prepared and sequenced in Mouse Genome Encyclopedia Project of Genome Exploration Research Group in Riken Genomic Sciences Center and Genome Science Laboratory in Riken Genomic Sciences Center and Genome Science Laboratory in RIKEN. Division of Experimental Animal Research in Riken contributed to prepare mouse tissues. First strand cDNA was primed with a primer [5' GAGAGAGAAGAACACTCTTTTTTTTTTTTTTTTTV 3'], cDNA was prepared by using trehalose thermo-activated reverse transcriptase and subsequently enriched for full-length by cap-trapper. cDNA went through one round of normalization to Rot = 10.0 and subtraction to Rot = 185.2. Second strand cDNA was prepared with the primer adapter of sequence [5'	GAGAGAGATTCTCGAGTTAATTAAATTAATCCCCCCCCCC	CDS 2621506  Anote="unnamed protein product; putative weakly similar to NT2RM1001115 PROTEIN [Homo sapiens] (SPTR   O9NW60. evidence: FASTY, S8.3%ID, 96.7%length, match=1104] (SPTR   O9NW60. evidence: FASTY, S8.3%ID, 96.7%length, match=1104]    Amoth=1104]   Amoth=1104]   Amoth=1104   Am
